

Doug Brignole Died Suddenly at age 63

(2022/10/14)

Bodybuilder, Author, Fitness Guru, Doug Brignole died suddenly at 63 years old. The official cause of death has not been revealed yet. In Brignole's case, it appears he may have answered that question through his social media. Here's what Brignole said about the SARS-CoV-2 'vaccine':

"Those of you who think the vaccine kills people can use me as a test. If I die, you were right. If I don't die, and have no ill effects, you were wrong, and should admit it. Better yet, you should admit that you were misled, and tell the world who misled you, so other people can benefit by avoiding those fear mongers."

I'm vaccinated ! Well, the first of two. Let's get this done so we can get back to traveling, going to concerts, and having fun. My vaccine was yesterday, and I had no problem with it. My deltoid was a bit sore, but otherwise fine. We're all in this together, so let's do our share to beat it.

Doug Brignole

I am not making this political (you said "...don't turn into something it's not"), and think it's strange that you would say that. I am merely saying I have confidence. I understand that some people don't agree, and I invite people to use me as a way of testing that belief. I believe it makes logical sense for people to say, "okay...let's see if anything happens to Doug...someone we know"...instead of believing 'reports' about people dying, not actually knowing any of the people who died, nor knowing whether what you have read is truly accurate. Here's a chance for you to see what happens to someone you know. Consider it an experiment, and acknowledge the outcome. It should not be dismissed. It's an actual test. (BTW, 3 million people per day are getting vaccinated in the U.S. now...if even 1/10 of one percent of those people die, we'd be having 300 vaccine deaths every single day...but that's not happening) "We have freedom in America"?? Of course we do. The vaccine is not mandatory...it is not illegal to refuse it. So why would you say "we have freedom in America"? If I post that I recommend a low carb diet, would you say, "we have freedom in America"?

...

So tragic he listened to the wrong people and misinformation...RIP **Doug Brignole**

I wonder when people are going to care that people have been murdered?

I care....my reason for sharing information every single day....I care so much I cannot think about anything else 🙄

I have enough confidence in the vaccine, based on my research, to get it done. Those of you who think the vaccine kills people can use me as a test. If I die, you were right. If I don't die, and have no ill effects, you were wrong, and should admit it (at least to yourselves). Better yet, you should admit that you were misled, and tell the world who misled you, so other people can benefit by avoiding those fear mongers.
